EDUCATION

Master of Science, Business Analytics (STEM) | University at Buffalo

June 2024

Relevant Coursework: DBMS, Python Programming, Data Warehousing (Snowflake, GCP) | Statistics | Predictive Analytics | Prescriptive Analytics | Cybersecurity Analytics (Splunk)

Bachelor of Engineering, Computer Science and Engineering | Anna University

May 2017

AREAS OF EXPERTISE

Skills: Stakeholder Management, Product Prototyping, Business Analysis, Software Development Life Cycle (SDLC), Communication and Collaboration, Product Analysis & Planning, Requirements Gathering, Cross-Functional Collaboration, Agile - Scrum & Kanban

Data Management and Analytics: Business Intelligence, SQL, Snowflake, Dynamo DB, ETL, Talend, Microsoft Azure DevOps, Jenkins, Jira, Confluence, Tableau, Azure Functions, AWS Lambda, S3

Programming Languages: Python, R, C#, Angular, .Net Core, Node.js

EXPERIENCE

Technical Lead, ConnectiveRx (Consultant)

August 2024 - Present

Recruited to the Production team to deliver technical solutions & analytical support for resolving production incidents.

- Prioritized incident tickets based on business impact and **SLA**, coordinating fixes across engineering, QA, and operations teams.
- Built secure **.NET Core REST APIs** integrated with **AWS API Gateway** for seamless Angular-backend **microservices** communication.
- Designed **AWS cloud-native ETL workflows** with **Lambda, Step Functions, API Gateway**, and **S3**, **cutting processing time by 40%**.
- Performed **risk assessments** on identified incidents, prioritizing issues, and deploying **risk mitigation strategies** to protect system integrity.
- Acted as product **SME** for post-deployment support, ensuring smooth transitions **from development to production** for new features.
- Implemented **CloudWatch Logs, X-Ray**, and **dashboards** for proactive monitoring and troubleshooting of .NET microservices.
- Implemented **agile** methodologies and **DevOps** practices, increasing **sprint velocity by 60%** and **team productivity by 50%**.
- Managed end-to-end Agile release cycles, ensuring smooth planning, development, and timely deployment of features

Associate Lead Developer, Customer Analytics

August 2021 - May 2023

Recruited to the Product Development team to lead the modernization of Ashley's Order Management System (OMS).

- Directed **end-to-end modernization of Ashley's OMS**, focusing on enhancing scalability, efficiency, and user experience.
- Defined **product vision** for the new Order Management System, to streamline order processing and improve operational efficiency.
- Collaborated cross-functionally with stakeholders to **transform business needs into product features**, aligning tech solutions with goals.
- Developed and executed **strategic roadmap**, setting clear milestones and overseeing progress to meet target deliverables on time.
- Identified and addressed **performance bottlenecks** in development processes, **reducing bug delays by 25%** and improving code quality.
- Utilized **data analysis** to track system performance, informing iterative improvements that optimized **order processing efficiency**.
- Established and maintained **product backlogs using Azure DevOps**, capturing over **125 new user stories** emerging during development.

Software Analyst, Agilysys Inc.

February 2019 - July 2021

Reporting to the Vice President of Engineering, this role involved developing a Loyalty & Promotions application from the ground up.

- Pioneering as **founding developer**, led development of Loyalty & Promotions system, managing development and stakeholder engagement.
- Facilitated **10 JAD sessions** and conducted interviews/surveys to **gather requirements** from over 30 key stakeholders across customers.
- Delivered **impactful demos to stakeholders and clients**, showcasing project functionalities and benefits, securing buy-in for implementation.
- Identified and **addressed performance bottlenecks** in development processes, reducing bug delays by 25% and improving code quality.
- Developed and executed a successful **go-to-market** strategy for a new feature, resulting in a 40% increase in revenue.
- Conducted **competitor analysis and industry research** to stay ahead of market trends and identify new opportunities for growth.
- Resolved **cross-functional conflicts**, facilitating agreement among **15+ stakeholders** and enabling successful implementation as planned.

Associate Software Engineer, CGI

June 2017 - January 2019

Hired to assist in the development of a healthcare application, collaborating with leadership to design a patient management system.

- Played pivotal role in **requirement gathering**, including travel to Finland, to ensure software met healthcare industry needs.
- Automated **quality assurance with C# based Ranorex tool**; refined software quality, increased efficiency, leading to faster release cycle.
- Implemented **Jenkins** pipelines to **automate regression** and **smoke testing** for processing workflows, reducing manual QA effort by 40%.
