

SOMESH RAJASEKAR

New York | +1 (716) 465-3741 | tosomeshinbox@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Accomplished **Product Development Lead** with **7+ years** of expertise in software design, development, and integration. Adept at **translating business needs into technical solutions**, with a strong ability to align development teams with stakeholder goals to drive successful product launches. Experienced in building **innovative solutions from concept to go-live**, ensuring high-impact results.

EDUCATION

Master of Science, Business Analytics (STEM) | University at Buffalo, The State University of New York

June 2024

Bachelor of Engineering, Computer Science and Engineering | Anna University

May 2017

AREAS OF EXPERTISE

Data Management and Analytics Skills: Business Intelligence, SQL (Postgres, MSSQL, Oracle), AWS Dynamo, Splunk, Snowflake, ETL, Apache Spark, Apache Airflow, Apache Kafka, Data Warehouse, Talend, Microsoft Azure DevOps, Jenkins, Jira, Confluence, Tableau.

Programming Skills: C#, Python, .Net Core, .Net Framework, AWS Lambda, AWS S3, AWS API Gateway, Azure Functions, Azure Service Bus, Azure API management (APIM), UNIX Shell Scripting, JavaScript, Angular, Git.

Professional Skills: Product Development, Product Prototyping, Stakeholder Management, Team Management, Leading Discussions, Microsoft Office, Client Relationship, Problem Solving, Requirements Gathering, Product Analysis & Planning, Agile - Scrum & Kanban.

EXPERIENCE

Technical Consultant, ConnectiveRx (Consultant), Health Care

August 2024 - Present

Recruited to the Product Development team to deliver technical solutions & analytical support for resolving production incidents.

- Built secure **.NET Core REST APIs** integrated with **AWS API Gateway** for seamless Angular-backend **microservices** communication.
- Designed **AWS cloud-native ETL workflows** with **Lambda, Step Functions, API Gateway**, and **S3**, **cutting processing time by 40%**.
- Implemented **CloudWatch Logs, X-Ray**, and **dashboards** for proactive monitoring and troubleshooting of Java microservices.
- Led end-to-end **Angular modernization projects**, implementing **scalable .NET Core APIs** and **microservices** to enhance functionality.
- Automated **reporting pipelines** with **Python** scripts and **AWS**, enabling **data-driven** client decision-making and reducing manual reporting.
- Acted as product **SME** for post-deployment support, ensuring smooth transitions **from development to production** for new features.
- Managed end-to-end Agile release cycles, ensuring smooth planning, development, and timely deployment of features.

Associate Lead Developer, Customer Analytics

August 2021 - May 2023

Recruited to the Product Development team to lead the modernization of Ashley's Order Management System.

- Led and performed **requirements gathering** and **JAD** sessions across 2 core products, aligning inputs from 20+ cross-functional stakeholders.
- Designed and implemented **Azure Functions** to handle order workflows, integrating with downstream systems and ensuring high availability.
- Built and managed **Service Bus queues and topics** to support decoupled communication across OMS modules, improving system scalability.
- Identified and **addressed performance bottlenecks** in development processes, reducing bug delays by 25% and improving code quality.
- Led **GitHub pull request-based code reviews** to enhance overall code quality, facilitating collaborative peer meetings to foster teamwork.
- Conducted technical interviews** to identify and onboard new talent, significantly contributing to the growth of the development team.
- Mentored new team members** and **conducted performance reviews** for permanent employees within the team to foster growth.

Software Analyst, Agilysys Inc.

February 2019 - July 2021

Reporting to the Vice President of Engineering, this role involved developing a Loyalty & Promotions application from the ground up.

- Pioneering as **founding developer**, led development of Loyalty & Promotions system, managing development and stakeholder engagement.
- Managed **Azure** environment design and successfully **migrated legacy applications to cloud**, enhancing scalability and efficiency.
- Implemented **microservices architecture** to improve scalability, enhance system modularity, and achieve significant 30% performance boost.
- Implemented **dependency injection** and **middleware** to enhance modularity and improve request handling efficiency for **CRM** platform.
- Resolved cross-functional conflicts**, facilitating agreement among **stakeholders** and enabling successful implementation as planned.
- Automated deployment via CI/CD pipelines in Microsoft Azure DevOps**, achieving 50% faster deployments, and 30% quicker releases.

Associate Software Engineer, CGI

June 2017 - January 2019

- Played pivotal role in **requirement gathering**, including travel to Finland, to ensure software met healthcare industry needs.
- Automated quality assurance with C# based Ranorex tool**; refined software quality, increased efficiency, leading to faster release cycle.
